Rd. Mt. Mining		75

### ENGINEERS IN NEVADA.

Samuel Newhouse has mining engineers inspecting the mineral fields in almost every portion of Nevada, and, in fact, in every section where the development work has reached a point where it has been determined that a mining property with a long producing career just ahead has been established. The people of the Ramsey are anxious to learn what decision will be reached by Mr. Newhouse upon his return from Europe, relative to taking over of the control of the Ramsey-Comstock mining properties, as it will mean that a great deal of money will be expended on development and equipment of that ground, and the district will be greatly benefited by the acquisition of such a prominent mining operator.

For several weeks P. Flynn, said to be representing Mr. Newhouse, was at the mine going through it on every level. He seemed to be well pleased with the showing and Ramsey people believe that the deal will go through. Ramsey-Comstock is in perfect condition for examination, owing to the long drifts on high grade ore. Both faces are in shipping ore. Mr. Flynn went through every drift and took samples by the quartering down method everywhere. He has now returned to Salt Lake City with the samples to make his report, which everyone thinks will be favorable. In a day or so, a mining engineer of Mr. Newhouse's staff is expected at the mine to make surveys and estimates to supplement the work of Mr. Flynn. The owners are reticent as to the price that Mr. Newhouse has taken under consideration, but the amount will exceed \$100,000.

**MONTANA CAFE SPECIAL PRICES**  
Ham and eggs, 35c; bacon and eggs, 35c.

## AFFECTIONS UNDER FALSE PRETENSES

PORTLAND, Ore., Feb. 18.—On the unusual charge of obtaining affections under false pretenses John Gribble, a young Californian, has been lodged in the Multnomah county jail on the complaint of Miss Katherine McCall, his former fiancée. He was imprisoned on a writ of arrest issued in connection with a \$5000 damage suit filed by Miss McCall.

According to Miss McCall's complaint filed today, she became engaged to Gribble at San Rafael, Cal., in 1904. She declares Gribble won her consent to a delayed wedding by representing that he had a rich legacy left him by a relative in England. Gribble was to get the money when he became 25, but that time came and the valuable estate did not. Now, Miss McCall asserts, Gribble refuses to marry her and he is consequently confined in jail because of his inability to furnish bail.

### SMELTER FOR LODI.

Lodi is situated sixty miles southwest of Austin, Nev., in Nye county, and is the mining district in which a number of Salt Lakers became interested several years ago. For a time there was a great deal of activity in the opening up of the mineral belt in that section, and several hundred thousand dollars worth of ores was sent to the valley smelting plants. After the first summer it developed that the cost of transporting the ores from the mines by means of wagons and railroads amounted to \$30 a ton before the product reached the smelters for treatment. This decided the operators to await the coming of a railroad, or some other sort of relief, as it was evident that the mine owners and leasers could not stand this heavy transportation charge.

Recently the directors of the Lodi Mines Company met in Denver and it was decided to get up plans for the construction of a smelting plant and have the new furnaces completed and ready for commission during the coming summer. Manager Grill of the Lodi Mines Company has just passed through the city en route to the mine and says that he will put into execution the orders of the company at the earliest date possible. A traction engine is part of the new equipment that is to be provided, and this machine will haul the coal, coke and oil from the railroad station at Lunning, to the mines. The road has already been placed in condition for the running of this machine, and with mild climate, no trouble is anticipated in hauling the ores during the entire year.

The plant, as planned, is to be for company use. However, it is said that if enough custom ores can be provided, the smelting plant will be enlarged to accommodate every one in that section and insure an outlet for all the ores that can be mined.

### BEQUEST TO HARVARD.

NEWPORT, R. I., Feb. 20.—By the will of the late Mrs. Amy Sheldon, filed here today, a bequest of \$300,000 to Harvard University was made.
